FASIN's Pigging Equipment provide the complete solutions for the Supply of best Pig for Pipe Line Cleaning considering the requirements either its required for Heavy Wiping & Dewatering or Cleaning or Heavy Scraping or Light Scraping or Regular Scraping or Maximum Scraping or Drying etc.

Cups are one of the types of sealing elements used by steel-mandrel pigs. They are designed to allow the pressure of the line to seat the outer sealing surface of the cup against the internal pipe surface to ensure positive seal. Cups are flexible so as to adapt to out-of-round or varying internal pipe diameters.

Styles range from standard to conical, as well as special designs such as those for thin-wall pipes.

Conical Cup
