Yesrub Automation was established in the year 2000 . In partnership with world leading manufacturers we have been providing a broad range of industrial equipments with leading edge Control , instrumentation and Automation.

- Oil & Gas
- Power generation
- Textile
- Engineering consultants
- Many Others

YESRUB is managed by highly qualified and competent team of professionals equipped with sound technical knowledge, skills, and vision to face the challenge of managing in complex work environment of 21st century.

Our work philosophy is based on the simple fact of always ensuring the best quality, strictly in time shipments, efficient feedback, highly personalized services, and the most competitive prices.

Further to this Yesrub Automation has strived to provide added value to clients with a comprehensive level of local support and service. Including locally endorsed warranty repair & service workshop facilities, experienced technicians, stocked warehouse & logistics, site service & preventative maintenance.

Yesrub Automation is the only Organisation which is specialised in all the products / Items / Spare Parts which are obsolete or hard to find and beside these YESRUB is the main stockist of all the turbine parts in the world.
