TPS water technologies since 1984 a global leader in reverse osmosis systems and wastewater treatment. We manufacturers the best in class reverse osmosis and wastewater treatment system. We have expanded our product offerings over the years. Our selection includes water pumps, swimming pool equipment, domestic, commercial, industrial reverse osmosis, and American water heaters. We aim to provide premium quality products at reasonable prices. We carefully assess the requirements and issues encountered by consumers and work towards mitigating them by offering a wide range of international products.

For over 36 years, TPS has been the main player in the sector of the technologies for the movement and management of our most precious resource water and the first corporation who introduced German water pumps, reverse osmosis, and wastewater systems manufactured in our futuristic facility in Germany. We provide simple and cost-effective solutions that meet the needs of the consumer.
