Most trusted name in UPVC Products

Hydroplast is one of Pakistan's top producers of UPVC pipe fittings. All plumbing applications use UPVC Pipes Fitting, which is best suited for home concealed piping systems, outdoor installations, and agriculture watering systems. We recognize and value our customers' desire for more dependable services, of the highest caliber, and delivered more quickly. Your satisfaction is our prerogative and is what we testify to do concerning our products, workmanship, and cutting-edge technology for efficient business operations. As is customary with us,

Hydroplast delivers a wide range of UPVC Fittings. They are affordable, long-lasting, leak-proof, simple, and quick to connect. These fittings include reducers, elbows, tees, end caps, 45- and 90-degree flanges, and coupling sockets. For various pressure classes of pipes, UPVC Pipes & Fittings come in a range of diameters. conforming to worldwide standards like BS, PS, ASTM, etc.

UPVC or polyvinyl chloride is a versatile material used for many purposes, most notably in the construction industry. UPVC fittings are used extensively in the plumbing and HVACR industries because they are strong, durable, and easy to work with. They are also cost-effective and have a long lifespan. PVC fittings come in a variety of shapes and sizes, making them ideal for all sorts of applications.
